The River Tyne (Tunnels) Order

Application Documents

Errata: Environmental Statement, Non Technical Summary (NTS)

Page 16, Paragraph 1 (Effects on River Tyne, Navigation, Draught and Dredging).

In the last sentence, "The depth of the new tunnel below the river bed would be sufficient to allow dredging to a level of - 11.2m OD, which has been agreed with the Port of Tyne Authority", the depth of - 11.2m OD should read -11.6m CD (Chart Datum). The use of the figure of -11.2 OD was a typographical error and the assessment was undertaken having regard to a depth of -11.6CD. As such, the changes do not affect the Environmental Statement already submitted as part of the application for the above Order or the conclusions that it contains.

This affects no other part of the Application Documents.
